

Alpine Training Services

Education through Outdoor Adventure

Alpine Training Services is dedicated to the personal growth and progress of all who participate in our adventures. Over the past 4 years, in partnership with the Girl Scout Councils of Southern and Central California, we have committed to creating a curriculum and range of itineraries that has enhanced the lives of many Girl Scouts and their families. And now, in Partnership with GSUSA, we are providing programs to all Girl Scouts with a strong emphasis on leadership, character growth and connectedness to self, others and the world as a whole.

Why Alpine Training Services?

At ATS we believe in supporting life long learning and long term impacts through each adventure we offer. We are continually inspired to offer adventure programming to the young women of Girl Scouts. We believe the outdoors is a perfect tool that provides the chance for girls to be challenged, inspired and empowered. We have witnessed the ever growing need for youth to be immersed in nature, providing them opportunities for self reflection, creating community and developing leadership and communication skills. It is our ultimate hope the girls take their learning back home and integrate it into their everyday lives.

Scholarship Opportunities

For each of our *destination* offerings, we have provided opportunity for girls to apply for a scholarship to support the financial commitment incurred by attending a *destination*. A scholarship application can be found at www.studio2b.org/escape/destinations.

ATS Leadership

An aspect of our Girl Scout adventure programming that we value is our promotion of all-female instructors. We believe it is an important part of the girls' experiences that they see strong women role models. Whenever possible, our adventure will be lead by all female staff. All our instructors, male and female alike, are professional, encouraging and committed to offering leadership programming congruent with the Girl Scout philosophy. They are fully accredited and certified in their disciplines and maintain a Wilderness First Aid and CPR certification or higher.
